Contractor Onboarding Process

From vendor shortlist to first day on site: documents, checks, induction and permits

A contractor who arrives without the right paperwork is a safety and legal risk. This process describes the stages a vendor passes through before any work starts on a member site. Stages one to three are done by procurement; four to six by the facilities team.

Process map

Stage	Owner	Output	Time
1. Pre-qualification	Procurement	Scored vendor profile; KYC and GST verified	3 days
2. Commercial agreement	Procurement / Legal	Signed contract with SLA and indemnities	5 days
3. Statutory documents	Vendor / HR	PF, ESI, labour licence, insurance, police verification	5 days
4. Safety induction	EHS	Induction record, PPE issued, permits explained	1 day
5. Access and systems	Security / IT	ID cards, biometrics, CMMS user accounts	1 day
6. Work permit	Facilities	Approved permit for first task	Same day

Document checklist

- Company registration, GST and PAN
- Labour licence and contractor registration under the CLRA where applicable
- PF and ESI registration, and the last three months of challans
- Insurance: workmen's compensation, public liability, and plant and machinery where relevant
- Police verification and medical fitness for each worker
- Trade licences for electricians, lift mechanics, high-voltage and working-at-height crews

Induction content

1. Site rules, emergency exits, assembly points and the alarm signal.
2. Permit-to-work rules: hot work, working at height, confined space, electrical isolation.
3. Waste handling, chemical safety and incident reporting.
4. Behaviour on site: access control, photography, tenant sensitivity.

Reviewing performance

After 30 days, the facilities lead reviews attendance, incidents, work-order closure and feedback from the users served. A vendor that misses the standard receives a written improvement plan with a 30-day deadline.
